True / False Questions

1. Record levels of American outward foreign direct investment from 2000 to 2009, totaling more than $2 trillion, caused U.S. exports to decline during this time period.

   True   False

   True   False

3. International trade includes exports, imports, and foreign direct investment.

   True   False
4. Importing and foreign direct investment are two approaches to meeting overseas demand.

   True   False

5. International firms must export their products or services in order to establish and expand their overseas operations.

   True   False

6. The dollar value of total world exports in 2010 was greater than the gross national product of every nation in the world except China.

   True   False

7. The magnitude of international trade and how it has grown are reflected in the fact that one-fourth of everything grown or made in the world is now exported.

   True   False

8. Globally, the overall level and rate of growth of merchandise exports exceed those of commercial services.

   True   False
9. The proportion of merchandise exports coming from Latin America and the Middle East decreased between 1980 and 2010.

   True  False

    True  False

11. The proportion of merchandise exports coming from Asia increased by over 90 percent between 1980 and 2010, with China accounting for nearly two-thirds of that increase.

    True  False

12. In 2009, the top 10 exporting and importing nations collectively accounted for over half of all exports and imports of merchandise and services worldwide.

    True  False

13. Both developed nations and developing nations tend to trade more with developed nations.

    True  False
14. Approximately 70 percent of the exports from developed countries go to developed countries.

True  False

15. The development of expanded regional trade agreements, such as the Association of Southeast Asian Nations, Mercosur, and the EU, can substantially alter the level and proportion of trade flows within and across regions.

True  False

16. There are a number of advantages in focusing attention on a nation that is already a sizable purchaser of goods coming from the would-be exporter’s country.

True  False

17. China, Mexico, and Japan are the three largest trading partners of the United States, in terms of the total volume of imports and exports.

True  False

18. The first formulation of international trade theory, by Adam Smith, was motivated by political considerations.

True  False
19. The central idea of mercantilism is that there should be an export surplus so a nation can accumulate precious metals.

   True    False

20. Arguments in support of mercantilism largely disappeared after the end of the mercantilist era in the late 1700s.

   True    False

21. The theory of absolute advantage suggests that under free, unregulated trade, each nation should specialize in producing those goods it can produce most efficiently.

   True    False

22. Adam Smith explained how countries can benefit from international trade even if they lack any absolute advantage over their trade partners.

   True    False

23. According to the theory of comparative advantage, a nation can gain from trade if it is not equally less efficient in producing two goods.

   True    False
24. If a Chinese worker earns $1 a day, then goods produced by this worker will cost less than the same goods produced by an American earning $18 an hour.

True   False

25. An arrangement in which one or more activities that could be provided in-house are instead provided by another company is offshoring.

True   False

26. Some observers have argued that American industry and the American economy as a whole will be strengthened by offshoring activities to workers in India or other nations that have comparative advantages in areas such as labor costs.

True   False

27. The price of one currency stated in terms of another currency is the exchange rate.

True   False

28. Currency devaluation helps a nation avoid losing markets and regain competitiveness in world markets.

True   False
29. Linder's theory of overlapping demand explains the direction of trade for minerals and agricultural products.

True   False

30. Michael Porter claims that demand conditions, factor conditions, related and supporting industries, and firm strategy, structure, and rivalry, rather than government and chance, are factors that affect national competitiveness.

True   False

31. A nation's relative ability to design, produce, distribute, or service products within an international trading context, while earning increasing returns on its resources, is known as national competitiveness.

True   False

32. The primary reason for international trade is a lack of natural resources in the developed nations.

True   False

33. According to the text, differences in taste, a demand variable, can reverse the direction of trade predicted by the theory.

True   False
34. International trade theory shows that nations will attain a higher level of living by specializing in goods for which they possess a comparative advantage and importing those for which they have a comparative disadvantage.

True    False

35. Portfolio investment is the purchase of sufficient stock in a firm to obtain significant management control.

True    False

36. Direct investment refers to overseas purchases of stocks and bonds to gain a return on the funds invested.

True    False

37. The book value, or the value of the total outstanding stock, of all foreign direct investment worldwide was $19 trillion at the beginning of 2010.

True    False

38. The proportion of the outstanding stock of foreign direct investment accounted for by the United States declined by two-thirds between 1980 and 2010.

True    False
39. Reflecting their continued economic development, developing countries have dramatically increased their share of FDI stock, from 1 percent in 1980 to 14 percent in 2010.

True    False

40. An important development in the level of worldwide FDI is the emergence of what has been called the "bamboo network" of ethnic Chinese family businesses based outside China.

True    False

41. Historically, approximately two-thirds of the value of corporate investments made in the United States from abroad has been spent to acquire going companies rather than to establish new ones.

True    False

42. Industrialized nations invest primarily in one another just as they trade more with one another.

True    False

43. If a nation is continuing to receive appreciable amounts of foreign investment, its investment climate must be favorable.

True    False
44. Historically, foreign direct investment has followed foreign trade, and one reason is that foreign trade is typically less costly and less risky than making a direct investment into foreign markets.

True  False

45. Developed by the United Nations Conference on Trade and Development, the Trade and Development Index is a tool whose goal is to assist efforts "to systematically monitor the trade and development performance of developing countries with a view to facilitating national and international policies and strategies that would ensure that trade serves as a key instrument of development."

True  False

46. Foreign direct investment may be an attempt by foreign companies to establish competitive advantage over potential competitors in other markets, due to possession of advantages not available to local firms. Such advantages possessed by foreign companies over their local competitors include knowledge about local market conditions and cost efficiencies from operating at a distance.

True  False

47. Internalization theory suggests that what an organization is good at should not be outsourced without very careful consideration.

True  False
48. The dynamic capability theory states that for a firm to invest overseas, it must have three kinds of advantages: ownership specific, internalization, and location specific.

True    False

49. Dunning’s eclectic theory of international production provides an explanation for the choice by the international firm of its overseas production facilities.

True    False

50. The major part of foreign direct investment is made by large, research-intensive firms in oligopolistic industries.

True    False

Multiple Choice Questions
51. According to the Exporter Data Base, small and medium-sized enterprises accounted for __________ of all U.S. exporters.

A. under 10 percent  
B. 25 percent  
C. nearly half  
D. 86 percent  
E. nearly 98 percent

52. Regarding the volume of international trade, exports of goods and services __________ in 2010.

A. were nearly $4.0 trillion  
B. reached $5.8 trillion  
C. were $10.4 trillion  
D. were nearly $19.0 trillion  
E. exceeded $24.5 trillion
53. One measure of the magnitude of international trade and how it has grown is that __________ of everything grown or made in the world is now exported.

A. 10 percent
B. 25 percent
C. 32 percent
D. 45 percent
E. over two-thirds

54. In examining the volume of international trade:

A. exports of merchandise grew nearly fivefold between 1990 and 2010.
B. exports of services grew more than 10-fold between 1980 and 2010.
C. the proportion of world exports of commercial services accounted for by the United States fell by nearly 20 percent between 1980 and 2010.
D. all of the above.
E. two of A, B, and C.
55. The level of merchandise exports in 2010, worldwide, was:

A. $3.7 trillion.
B. $8.5 trillion.
C. $15.2 trillion.
D. $18.9 trillion.
E. $23.4 trillion.

56. The level of services exports in 2010, worldwide, was:

A. $3.7 trillion.
B. $8.5 trillion.
C. $15.2 trillion.
D. $18.9 trillion.
E. $23.4 trillion.

57. Between 1980 and 2010, the level of merchandise exports from Africa:

A. doubled as a proportion of overall world merchandise exports.
B. increased by 250 percent.
C. declined by half.
D. grew more rapidly as a proportion of world merchandise exports than did the European Union.
E. two of the above.
58. The proportion of world commercial services exports accounted for by __________ has evidenced an overall decline since 1980.

A. the European Union
B. Africa
C. the United States
D. all of the above
E. two of A, B, and C

59. The proportion of world commercial services exports accounted for by __________ has evidenced an overall decline since 1980.

A. Asia
B. the Middle East
C. Latin America
D. all of the above
E. two of A, B, and C
60. The rapid expansion of world exports since 1980 demonstrates that:

A. businesspeople must be prepared to meet increased competition.
B. domestic business cannot compete with cheap imports.
C. the opportunity to increase sales by exporting is a viable growth strategy.
D. all of the above.
E. two of A, B and C

61. In examining the volume of international trade:

A. the proportion of manufacturing value added generated by South and East Asia has quadrupled since 1980.
B. the proportion of manufacturing value added generated by Latin America has doubled since 1980.
C. the proportion of world exports and imports accounted for by the 10 largest exporting and importing nations exceeded 70 percent in 2010.
D. all of the above.
E. two of A, B, and C.
62. More than one-half of the exports from developing countries go to ________ countries, and this proportion has been ___________ over the past 35 years.

A. developed; increasing
B. developing; increasing
C. developed; decreasing
D. developing; decreasing
E. none of the above

63. More than half of the exports from developing nations go to developed nations, and:

A. this proportion has been declining over the past 35 years.
B. approximately 70 percent of exports from developed economies also go to other industrialized nations.
C. the proportion of world trade accounted for by members of regional trade agreements has grown to nearly 50 percent.
D. all of the above.
E. two of A, B, and C.
64. When considering where to export, advantages to managers of focusing on a nation that is already a sizable purchaser of goods coming from the home country include:

A. the cultures of the two countries should be relatively similar and compatible.
B. the climate for foreign direct investment in the importing nation is relatively favorable.
C. export and import regulations are not insurmountable.
D. all of the above.
E. two of A, B, and C.

65. When considering where to export, advantages to managers of focusing on a nation that is already a sizable purchaser of goods coming from the home country include:

A. the political climate in the importing nation is relatively stable.
B. there are abundant natural resources in the importing nation.
C. satisfactory transportation facilities have already been established.
D. all of the above.
E. two of A, B, and C.
66. The three largest markets for American exports of goods in 2010 were:

A. Japan, the UK, and China.
B. Japan, Mexico, and the UK.
C. Canada, Mexico, and China.
D. Canada, Japan, and the UK.
E. Japan, Mexico, and China.

67. The three nations that exported the largest amount of goods to the United States in 2010 were:

A. Japan, Canada, and China.
B. China, Mexico, and the UK.
C. Japan, China, and Saudi Arabia.
D. Canada, Japan, and Mexico.
E. Canada, Mexico, and China.
68. Many of the Asian countries that are major exporters to the United States are also significant importers of American goods because:

A. their rising standards of living enable their people to afford more imported products.
B. they are purchasing large amounts of capital goods to further their industrial expansion.
C. they are importing raw materials and components that will be assembled and subsequently be exported, often to the United States.
D. all of the above.
E. two of A, B, and C.

69. Supporters of mercantilism:

A. viewed accumulation of precious metals as an activity essential to a nation's welfare.
B. viewed industrial development as the primary source of a nation's wealth.
C. promoted trade policies that generally benefited consumers and emerging industrialists.
D. all of the above.
E. two of A, B, and C.
70. Mercantilists believed that:

A. merchants should import goods to raise the level of living.
B. governments should lower import duties.
C. a nation should have an export surplus in order to accumulate precious metals.
D. a nation should produce goods for which there is a comparative advantage.
E. two of the above.

71. Adam Smith claimed that:

A. governments, not market forces, should determine the directions, volume, and composition of international trade.
B. a nation could trade advantageously if it had a comparative advantage.
C. market forces, not government controls, should determine direction, volume, and the composition of international trade.
D. customers' tastes are affected by income levels.
E. two of the above.
72. The capability of one nation to produce more of a good with the same amount of input than another country is:

A. a comparative advantage
B. an absolute advantage
C. a mercantilist advantage
D. none of the above
E. two of A, B, and C

73. If Ecuador has an absolute advantage in coffee and Argentina in wheat, then, according to trade theory:

A. Ecuador should focus production on coffee and trade for wheat.
B. Ecuador would do well to produce its own coffee rather than import it from Bolivia.
C. Argentina should focus on producing wheat and trade for coffee.
D. all of the above.
E. two of A, B, and C.
74. A nation having absolute disadvantages in the production of two goods with respect to another nation has ___________ in the production of the good in which its absolute disadvantage is less.

A. a comparative advantage  
B. an absolute advantage  
C. a mercantilist advantage  
D. none of the above  
E. two of A, B, and C  

75. According to the theory of comparative advantage:

A. a nation should produce those goods which it is more efficient at producing than are other nations.  
B. a nation can gain from trade if it is equally inefficient in producing two goods.  
C. a nation must have an absolute advantage in at least one good to gain from trade.  
D. all of the above.  
E. none of A, B, or C.
76. Locating activities in another nation is:

A. outsourcing.
B. offshoring.
C. foreign direct investment.
D. all of the above.
E. two of A, B, and C.

77. Offshoring is an application of:

A. comparative advantage.
B. differences in taste.
C. money market rates.
D. exchange rate theory.
E. none of the above.
78. According to trade theory:

A. traders need to know the exchange rate between their own currency and that of the nation they are considering trading with before they can decide whether it is advantageous to import, export, or buy locally.

B. if a currency's exchange rate strengthens, then its exporters will no longer be able to profitably export their products.

C. devaluation of a currency will automatically cause a nation's products to be price-competitive in international markets.

D. all of the above.

E. two of A, B, and C.

79. Theory based on ________________ states that international and interregional differences in production costs occur because of differences in the supply of production factors.

A. comparative advantage

B. absolute advantage

C. mercantilist advantage

D. resource endowments

E. none of the above
80. The theory of resource endowment:

A. explains why France exports cosmetics, wine, commercial aircraft, and clothing.
B. states that a nation will trade goods that can be produced with the production factor that is most abundant.
C. explains why an automobile can be made either by hand or by a capital-intensive process.
D. explains why transportation costs may be ignored when calculating the costs of imports.
E. none of the above.

81. The theory of overlapping demand:

A. explains how international trade in manufactured goods will be linked to gross national income.
B. states that a nation will trade goods that can be produced with the production factor that is most abundant.
C. explains why companies will add excess capacity to their production systems.
D. two of the above.
E. none of A, B, or C.
82. The international product life cycle:

A. explains how international trade in manufactured goods will be linked to gross national income.
B. states that a nation will trade goods that can be produced with the production factor that is most abundant.
C. is concerned with the role of innovation in trade patterns.
D. two of the above.
E. none of A, B, or C.

83. Economies of scale and the experience curve:

A. explain how international trade in manufactured goods will be linked to gross national income.
B. state that a nation will trade goods that can be produced with the production factor that is most abundant.
C. explain why many companies will engage in international trade.
D. two of the above.
E. none of A, B, or C.
84. Which of the following elements are included in Porter’s Diamond Model of national advantage?

A. Competitive conditions  
B. Export conditions  
C. Social conditions  
D. Supply conditions  
E. None of the above

85. Porter’s Diamond Model of national advantage:

A. claims that the ability of local firms in a country to utilize the country’s resources to gain a competitive advantage is based on demand conditions, factor conditions, substitute products, and firm strategy, structure, and rivalry.  
B. links intraindustry trade to relative levels of per capita income.  
C. is not affected by chance.  
D. all of A, B, and C.  
E. two of A, B, and C.
86. ___________ occurs primarily because of relative price differentials among nations.

A. Foreign direct investment  
B. International trade  
C. Portfolio investment  
D. All of the above  
E. Two of A, B, and C

87. To sum up international trade theory, we can say that the primary reason for trade is:

A. the increase in OPEC oil prices.  
B. governments want to accumulate money.  
C. the existence of price differentials among nations.  
D. the creation of new nations from former colonies.  
E. none of the above.
88. Which of the following is explained by international trade theory?

A. Differences in production costs
B. Differences in levels of technology
C. Foreign exchange rates
D. Differences in efficiency of factor use
E. All of the above

89. Regarding foreign investment:

A. it can be divided into three components: international trade, portfolio investment, and direct investment.
B. portfolio investment involves investors who participate in the management of the firm in addition to receiving a return on their money.
C. deals that result in the foreign investor's obtaining at least 10 percent of the shareholdings are classified as portfolio investments.
D. two of A, B, and C.
E. none of A, B, and C.
90. Firms from ______ had the largest total outstanding stock of direct overseas investment at the beginning of 2010.

A. Germany  
B. the United States  
C. the United Kingdom  
D. Japan  
E. China

91. At the beginning of 2010, the value of the outstanding stock of foreign direct investment of all nations totaled more than:

A. $500 billion.  
B. $3 trillion.  
C. $12 trillion  
D. $19 trillion.  
E. $21 trillion.
92. Regarding the annual outflows of foreign direct investment:

A. the overall volume that came from developing nations in 2009 was nearly five times the level from those nations in 1990.
B. the proportion that came from the United States and Europe was nearly 50 percent in 2009.
C. much of the recent increase has been associated with mergers, acquisitions, and other international investments made by companies in industries facing increased competition and global consolidation.
D. nearly half went to China and its territories from 2007 to 2009.
E. all of the above.

93. Regarding annual inflows of FDI:

A. industrialized nations primarily invest in one another.
B. an average of nearly 70 percent of annual FDI investments has been going into developed countries in recent years.
C. developed countries obtained a 70 percent increase in the level of FDI between 2000 and 2009.
D. all of the above.
E. two of A, B, and C.
94. Regarding foreign direct investment and trade:

A. historically, foreign trade has followed foreign direct investment.
B. foreign trade is typically more costly and more risky than making a direct investment into foreign markets.
C. typically, a firm would hire sales representatives to live in overseas markets as a first step in developing international trade.
D. fewer government barriers to trade, increased competition from globalizing firms, and new production and communications technology are causing many international firms to disperse the activities of their production systems to locations close to available resources.
E. all of the above.
95. Regarding economic and social development:

A. international trade has an important role in influencing nations' economic and social performance, with this role being even more fundamental in the case of developed countries.
B. expansion of trade guarantees improvement for a country and its people.
C. the Trade and Development Index attempts to provide a quantitative indication of a nation's social and economic development.
D. the 30 highest-ranked nations in the initial Trade and Development Index were all developed countries.
E. for the Trade and Development Index, the best regional performance among developing countries was that of the countries of the East Asia and Pacific region.

96. The monopolistic advantage theory suggests that firms in oligopolistic industries are likely to ___________ foreign direct investment when they have technical and other advantages over indigenous firms.

A. increase
B. reduce
C. ignore
D. not change
E. none of the above
97. The monopolistic advantage theory states that:

A. a firm that has a monopoly has a major advantage in overseas investment.
B. FDI is made by firms in oligopolistic industries possessing technical advantages over local companies.
C. a firm that has a monopoly domestically will have no competition making overseas investments.
D. the firm making the overseas investment first has a monopolistic advantage.
E. none of the above.

98. Dunning’s eclectic theory of international production states that if a firm is going to invest in production facilities abroad, it must have the following kinds of advantages:

A. ownership specific, location specific, and internationalization.
B. strategic, organizational, and technological.
C. political, technological, and human resource.
D. technological, financial, and human resource.
E. none of the above.

Essay Questions
99. Discuss the advantages in focusing attention on a nation that is already a sizable purchaser of goods coming from the exporter’s home country.

100. Explain the logic of mercantilism and why it is generally viewed as a deficient theory.
101. Discuss the theory of absolute advantage and how it explains the basis for trade between nations.

102. Discuss the keystone of international trade, the theory of comparative advantage.
103. Discuss Dunning's eclectic theory of international production as a theory to explain flows of international trade and foreign direct investment.
True / False Questions

1. Record levels of American outward foreign direct investment from 2000 to 2009, totaling more than $2 trillion, caused U.S. exports to decline during this time period.

   **FALSE**

   American outward FDI reached a record $1.20 trillion from 2006 to 2009. These figures represent more than 1.3 times the U.S. average a decade before, from 1996 to 1999. Yet the overall level of American exports of goods and services increased from $1.1 trillion in 2000 to $1.8 trillion in 2010, an increase of 64 percent in a decade.

Learning Objective: 02-02 Identify the direction of trade; or who trades with whom; and trends in such trade.  
Topic Area: Major trading partners: Their relevance for managers

17. China, Mexico, and Japan are the three largest trading partners of the United States, in terms of the total volume of imports and exports.

**FALSE**

China, Mexico, and Canada are the three largest trading partners of the United States.

AACSB: Reflective Thinking  
Blooms: Understand  
Difficulty: 2 Medium  

Learning Objective: 02-02 Identify the direction of trade; or who trades with whom; and trends in such trade.  
Topic Area: Major trading partners: Their relevance for managers
18. The first formulation of international trade theory, by Adam Smith, was motivated by political considerations.

**TRUE**

As stated directly in the text.

19. The central idea of mercantilism is that there should be an export surplus so a nation can accumulate precious metals.

**TRUE**

As stated directly in the text.
20. Arguments in support of mercantilism largely disappeared after the end of the mercantilist era in the late 1700s.

**FALSE**

Mercantilist sentiments are still cited for explaining or criticizing behavior of countries such as China and when arguing that exports are "good" for a country or that imports are "bad."

21. The theory of absolute advantage suggests that under free, unregulated trade, each nation should specialize in producing those goods it can produce most efficiently.

**TRUE**

As stated directly in the text.
22. Adam Smith explained how countries can benefit from international trade even if they lack any absolute advantage over their trade partners.

**FALSE**

Ricardo developed an explanation of how countries can benefit from international trade even if they lack any absolute advantage over their trade partners.

23. According to the theory of comparative advantage, a nation can gain from trade if it is not equally less efficient in producing two goods.

**TRUE**

As stated directly in the text.
24. If a Chinese worker earns $1 a day, then goods produced by this worker will cost less than the same goods produced by an American earning $18 an hour.

**FALSE**

Wage costs are neither all of the production costs nor all of the labor costs, and labor can also exhibit differences in productivity.

AACSB: Reflective Thinking  
Blooms: Understand  
Difficulty: 3 Hard  
Learning Objective: 02-03 Outline the theories that attempt to explain why certain goods are traded internationally.  
Topic Area: Explaining trade: International trade theories

25. An arrangement in which one or more activities that could be provided in-house are instead provided by another company is offshoring.

**FALSE**

An arrangement in which one or more activities that could be provided in-house are instead provided by another company is outsourcing. *Offshoring* refers to the location of activities in another nation, whether those activities are done by the company doing the offshoring or by another company.

AACSB: Reflective Thinking  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-04 Explain the size; growth; and direction of foreign direct investment.  
Topic Area: Foreign investment
26. Some observers have argued that American industry and the American economy as a whole will be strengthened by offshoring activities to workers in India or other nations that have comparative advantages in areas such as labor costs.

TRUE

As stated directly in the text.

AACSB: Reflective Thinking
Blooms: Understand
Difficulty: 2 Medium

Learning Objective: 02-04 Explain the size; growth; and direction of foreign direct investment.
Topic Area: Foreign investment

27. The price of one currency stated in terms of another currency is the exchange rate.

TRUE

As stated directly in the text.

AACSB: Reflective Thinking

Learning Objective: 02-01 Appreciate the magnitude of international trade and how it has grown.

Topic Area: International trade
53. One measure of the magnitude of international trade and how it has grown is that ________ of everything grown or made in the world is now exported.

A. 10 percent
B. 25 percent
C. 32 percent
D. 45 percent
E. over two-thirds

As stated directly in the text.

AACSB: Reflective Thinking
Blooms: Understand
Difficulty: 2 Medium

Learning Objective: 02-01 Appreciate the magnitude of international trade and how it has grown.
Topic Area: International trade
54. In examining the volume of international trade:

A. exports of merchandise grew nearly fivefold between 1990 and 2010.
B. exports of services grew more than 10-fold between 1980 and 2010.
C. the proportion of world exports of commercial services accounted for by the United States fell by nearly 20 percent between 1980 and 2010.
D. all of the above.
E. two of A, B, and C.

A and B are correct, so E is the proper response.
55. The level of merchandise exports in 2010, worldwide, was:

A. $3.7 trillion.
B. $8.5 trillion.
C. $15.2 trillion.
D. $18.9 trillion.
E. $23.4 trillion.

As stated directly in the text.

56. The level of services exports in 2010, worldwide, was:

A. $3.7 trillion.
B. $8.5 trillion.
C. $15.2 trillion.
D. $18.9 trillion.
E. $23.4 trillion.

As stated directly in the text.
57. Between 1980 and 2010, the level of merchandise exports from Africa:

A. doubled as a proportion of overall world merchandise exports.
B. increased by 250 percent.
C. declined by half.
D. grew more rapidly as a proportion of world merchandise exports than did the European Union.
E. two of the above.

As stated directly in the text.
58. The proportion of world commercial services exports accounted for by _________ has evidenced an overall decline since 1980.

A. the European Union
B. Africa
C. the United States
D. all of the above
E. two of A, B, and C

Both A and B are correct, so E is the appropriate answer.

AACSB: Reflective Thinking
Blooms: Understand
Difficulty: 3 Hard

Learning Objective: 02-01 Appreciate the magnitude of international trade and how it has grown.

Many of the Asian countries that are major exporters to the United States are also significant importers of American goods because:

A. their rising standards of living enable their people to afford more imported products.
B. they are purchasing large amounts of capital goods to further their industrial expansion.
C. they are importing raw materials and components that will be assembled and subsequently be exported, often to the United States.
D. all of the above.
E. two of A, B, and C.

As stated directly in the text.
69. Supporters of mercantilism:

A. viewed accumulation of precious metals as an activity essential to a nation's welfare.
B. viewed industrial development as the primary source of a nation's wealth.
C. promoted trade policies that generally benefited consumers and emerging industrialists.
D. all of the above.
E. two of A, B, and C.

As stated directly in the text.
70. Mercantilists believed that:

A. merchants should import goods to raise the level of living.
B. governments should lower import duties.
C. a nation should have an export surplus in order to accumulate precious metals.
D. a nation should produce goods for which there is a comparative advantage.
E. two of the above.

As stated directly in the text.
71. Adam Smith claimed that:

A. governments, not market forces, should determine the directions, volume, and composition of international trade.
B. a nation could trade advantageously if it had a comparative advantage.
C. market forces, not government controls, should determine direction, volume, and the composition of international trade.
D. customers' tastes are affected by income levels.
E. two of the above.

As stated directly in the text.
72. The capability of one nation to produce more of a good with the same amount of input than another country is:

A. a comparative advantage
B. an absolute advantage
C. a mercantilist advantage
D. none of the above
E. two of A, B, and C

As stated directly in the text.

AACSB: Reflective Thinking
Blooms: Understand
Difficulty: 2 Medium

Learning Objective: 02-03 Outline the theories that attempt to explain why certain goods are traded internationally.
Topic Area: Explaining trade: International trade theories
73. If Ecuador has an absolute advantage in coffee and Argentina in wheat, then, according to trade theory:

A. Ecuador should focus production on coffee and trade for wheat.
B. Ecuador would do well to produce its own coffee rather than import it from Bolivia.
C. Argentina should focus on producing wheat and trade for coffee.

D. all of the above.
E. two of A, B, and C.

As stated directly in the text.
74. A nation having absolute disadvantages in the production of two goods with respect to another nation has __________ in the production of the good in which its absolute disadvantage is less.

A. a comparative advantage  
B. an absolute advantage  
C. a mercantilist advantage  
D. none of the above  
E. two of A, B, and C

As stated directly in the text.
According to the theory of comparative advantage:

A. a nation should produce those goods which it is more efficient at producing than are other nations.

B. a nation can gain from trade if it is equally inefficient in producing two goods.

C. a nation must have an absolute advantage in at least one good to gain from trade.

D. all of the above.

E. none of A, B, or C.

As stated directly in the text.
76. Locating activities in another nation is:

A. outsourcing.

B. offshoring.

C. foreign direct investment.

D. all of the above.

E. two of A, B, and C.

As stated directly in the text.

77. Offshoring is an application of:

A. comparative advantage.

B. differences in taste.

C. money market rates.

D. exchange rate theory.

E. none of the above.

As stated directly in the text.
78. According to trade theory:

A. traders need to know the exchange rate between their own currency and that of the nation they are considering trading with before they can decide whether it is advantageous to import, export, or buy locally.

B. if a currency’s exchange rate strengthens, then its exporters will no longer be able to profitably export their products.

C. devaluation of a currency will automatically cause a nation’s products to be price-competitive in international markets.

D. all of the above.

E. two of A, B, and C.

As stated directly in the text.
79. Theory based on ______________ states that international and interregional differences in production costs occur because of differences in the supply of production factors.

A. comparative advantage
B. absolute advantage
C. mercantilist advantage
D. resource endowments
E. none of the above

As stated directly in the text.

Learning Objective: 02-04 Explain the size, growth, and direction of foreign direct investment.

Topic Area: Foreign investment
92. Regarding the annual outflows of foreign direct investment:

A. the overall volume that came from developing nations in 2009 was nearly five times the level from those nations in 1990.
B. the proportion that came from the United States and Europe was nearly 50 percent in 2009.
C. much of the recent increase has been associated with mergers, acquisitions, and other international investments made by companies in industries facing increased competition and global consolidation.
D. nearly half went to China and its territories from 2007 to 2009.
E. all of the above.

As stated directly in the text.
93. Regarding annual inflows of FDI:

A. industrialized nations primarily invest in one another.
B. an average of nearly 70 percent of annual FDI investments has been going into developed countries in recent years.
C. developed countries obtained a 70 percent increase in the level of FDI between 2000 and 2009.
D. all of the above.
E. two of A, B, and C.

Both A and B are correct, so E is the proper answer.

Topic Area: Explaining trade: International trade theories
94. Regarding foreign direct investment and trade:

A. historically, foreign trade has followed foreign direct investment.

B. foreign trade is typically more costly and more risky than making a direct investment into foreign markets.

C. typically, a firm would hire sales representatives to live in overseas markets as a first step in developing international trade.

D. fewer government barriers to trade, increased competition from globalizing firms, and new production and communications technology are causing many international firms to disperse the activities of their production systems to locations close to available resources.

E. all of the above.

As stated directly in the text.

Learning Objective: 02-04 Explain the size; growth; and direction of foreign direct investment.

Topic Area: Are economic and social development affected by trade and investment?
95. Regarding economic and social development:

A. international trade has an important role in influencing nations' economic and social performance, with this role being even more fundamental in the case of developed countries.

B. expansion of trade guarantees improvement for a country and its people.

C. the Trade and Development Index attempts to provide a quantitative indication of a nation's social and economic development.

D. the 30 highest-ranked nations in the initial Trade and Development Index were all developed countries.

E. for the Trade and Development Index, the best regional performance among developing countries was that of the countries of the East Asia and Pacific region.

Difficulty: 2 Medium

Learning Objective: 02-05 Explain several theories of foreign direct investment.  
Topic Area: Explaining FDI: Theories of international investment
97. The monopolistic advantage theory states that:

A. a firm that has a monopoly has a major advantage in overseas investment.

B. FDI is made by firms in oligopolistic industries possessing technical advantages over local companies.

C. a firm that has a monopoly domestically will have no competition making overseas investments.

D. the firm making the overseas investment first has a monopolistic advantage.

E. none of the above.

As stated directly in the text.
Dunning's eclectic theory of international production states that if a firm is going to invest in production facilities abroad, it must have the following kinds of advantages:

A. ownership specific, location specific, and internationalization.
B. strategic, organizational, and technological.
C. political, technological, and human resource.
D. technological, financial, and human resource.
E. none of the above.

Dunning's eclectic theory of international production states that if a firm is going to invest in production facilities abroad, it must have the following kinds of advantages: ownership specific, location specific, and internalization (not internationalization).

Essay Questions
99. Discuss the advantages in focusing attention on a nation that is already a sizable purchaser of goods coming from the exporter’s home country.

Answers may vary, but they might include the following points: Focusing on a nation that is already a sizable purchaser of goods coming from a would-be exporter’s country has such potential advantages as (1) the business climate in the importing nation is relatively favorable, (2) export and import regulations are not insurmountable, (3) there should be no strong cultural objections to buying that nation’s goods, (4) satisfactory transportation facilities have already been established, (5) import channel members (merchants, banks, and customs brokers) are experienced in handling import shipments from the exporter’s area, (6) foreign exchange to pay for the exports is available, and (7) the government of a trading partner may be applying pressure on importers to buy from countries that are good customers for that nation’s exports.

Learning Objective: 02-02 Identify the direction of trade; or who trades with whom; and trends in such trade.
Topic Area: Major trading partners: Their relevance for managers
100. Explain the logic of mercantilism and why it is generally viewed as a deficient theory.

Answers may vary, but mercantilism traditionally has been interpreted as an economic philosophy that viewed the accumulation of precious metals as an activity essential to a nation’s welfare because these metals were, in the mercantilists’ view, the only source of wealth. As a result, the government established economic policies that promoted exports and stifled imports, resulting in a trade surplus and protection of jobs in the mercantilist nation. Mercantilist behavior tended to be costly to groups such as consumers and some emerging industrialists and to raise the potential for retaliatory efforts by other governments that encounter trade deficits due to the policies of the mercantilist nation.

Learning Objective: 02-03 Outline the theories that attempt to explain why certain goods are traded internationally.

Topic Area: Explaining trade: International trade theories
101. Discuss the theory of absolute advantage and how it explains the basis for trade between nations.

Answers may vary, but the theory of absolute advantage states that a nation has absolute advantage when it can produce a larger amount of a good or service for the same amount of inputs as can another country or when it can produce the same amount of a good or service using fewer inputs than could another country. Under conditions of free, unregulated trade, each nation should specialize in producing those goods that it could produce more efficiently, exporting some of those goods to pay for imports of goods that could be produced more efficiently elsewhere and thus enabling both nations to gain from trade.

Learning Objective: 02-03 Outline the theories that attempt to explain why certain goods are traded internationally.

Topic Area: Explaining trade: International trade theories
102. Discuss the keystone of international trade, the theory of comparative advantage.

Answers may vary, but the theory of comparative advantage states that a nation having absolute disadvantage in the production of two goods with respect to another nation has a comparative or relative advantage in the production of the good in which its absolute disadvantage is less. Therefore, there will be potential gains from trade even if one country is less efficient than another in the production of each of two goods (as long as it is not equally less efficient in the production of both goods).

Topic Area: Explaining trade: International trade theories
103. Discuss Dunning's eclectic theory of international production as a theory to explain flows of international trade and foreign direct investment.

Answers may vary, but Dunning's eclectic theory of international production is currently the most widely cited and accepted theory for explaining FDI. The theory maintains that if a firm is going to invest in production facilities overseas, it must have three kinds of advantages: ownership specific, location specific, and internalization. The firm must have both location and ownership advantages to invest in a foreign plant. It will invest where it is most profitable to internalize its monopolistic advantage. These investments can be proactive, being strategically anticipated and controlled in advance by the firm's management team, or reactive, in response to the discovery of market imperfections.
