81) What level of social responsibility is expected from domestic firms? What level is expected from international firms?
Answer: Opinions on the level of social responsibility that a domestic firm should demonstrate range from one extreme—the only responsibility of a business is to make a profit, within the confines of the law, in order to produce goods and services and serve its shareholders' interests—to another extreme—companies should anticipate and try to solve problems in society. The stance toward social responsibility that a firm should take in its international operations, however, is much more complex—ranging perhaps from assuming some responsibility for economic development in a subsidiary's host country to taking an active role in identifying and solving world problems.
Diff: 3
Chapter: 2
Skill: Concept

AACSB: Ethical understanding and reasoning abilities

82) What is the relationship between global corporate culture and moral universalism?
Answer: The emergence of a global corporate culture (i.e., the integration of the business environments in which businesses operate) is leading towards global consensus about social responsibility (i.e., moral universalism). Despite this trend, however, there are regional variations in how companies respond to corporate social responsibility.

83) Explain the differences between moral universalism, ethnocentrism, and ethical relativism. Which approach is best?
Answer: When using the ethnocentric approach, the company applies the morality of its home country. In contrast, a company using ethical relativism adopts the moral code of the country in which it is doing business. Moral universalism is different in that it neither applies a moral code that is based on the home or host country, but rather uses a set of universal standards or codes that are derived from international codes of conduct. Ethics researcher Bowie argues that moral universalism is preferable to ethnocentrism and relativism as a guide for ethical decision making.

85) According to the international codes of conduct, how should MNEs handle technology transfer overseas?
Answer: MNEs should cooperate with governmental authorities in assessing the impact of transfers of technology to developing countries and in enhancing the technological capacities of developing countries. MNEs should develop and adapt technologies to the needs and characteristics of the countries in which they operate. MNEs should conduct research and development activities in developing countries, using local resources and personnel to the greatest extent possible.

86) What employment practices should MNEs follow abroad according to the international codes of conduct?
Answer: MNEs should cooperate with host governments' efforts to create employment opportunities in particular localities. MNEs should work to increase employment opportunities and standards in the countries in which they operate. MNEs should give advance notice of plant closures and mitigate the resultant adverse effects. MNEs should provide standards of employment equal to or better than those of comparable employers in the countries in which they operate. MNEs should pay, at minimum, basic living wages.

87) What is the primary problem for MNCs that try to define organizational ethics?
Answer: The biggest single problem for MNCs in their attempt to define a corporate-wide ethical posture is the great variation of ethical standards around the world. Many practices that are considered unethical or even illegal in some countries are accepted ways of doing business in others.

88) What are questionable payments? Why are they problematic for international managers?
Answer: Questionable payments are business payments that raise significant questions of appropriate moral behavior either in the host nation or in other nations. Such questions arise out of differences in laws, customs, and ethics in various countries, whether the payments in question are political payments, extortion, bribes, sales commissions, or "grease money"—payments to expedite routine transactions. The dilemma for Americans operating abroad is how much to adhere to their own ethical standards in the face of foreign customs, or how much to follow local ways to be competitive.

89) What is sustainable development? Why is sustainability a dilemma for MNCs?
Answer: Sustainable development for business enterprises involves adopting business strategies and activities that meet the needs of the enterprise and its stakeholders today, while protecting, sustaining, and enhancing the human and natural resources that will be needed in the future. The dilemma for corporations is that they are faced with trying to meet two often contradictory requirements: (1) selling at low prices and (2) being environmentally and socially conscious. However, competitive pressures limit the company's ability to raise prices in order to cover the cost of socially responsible policies. This is obviously contradictory to the well-being of societies.
